

Deep Dive into Trades

- Trading first bloods can improve your odds of winning a round by 2.5X.
- GodL are the best team at finding these trades, by a significant margin.
- The other side of the story is converting your first blood into a second kill, gaining a definitive man advantage.
- Soul, Xceed, and SPG lead the way in making these conversions

Who is the Best at Trading Out First Bloods?

GodL trade first bloods at the highest rate, and fairly quickly as well, not letting the other team gain an advantage.

Impact of Trading the First Blood

If your first blood gets traded, your win rate goes down from ~82% to ~54%. No apparent correlation between time taken to get traded and win rates so far. Most trades happen within 5 seconds of losing first blood.

TradeTimeBin	WinRateWithTrade	TradeRounds
0-5s	55.73%	131
6-20s	48.72%	39
>20s	56.76%	37

Converting First Blood into a Second Kill

On the flip side, if you can convert your first blood into a second kill, your win rate goes up from 54% to 82%. Soul, Xceed, and SPG lead the way at making these conversions. The bars here represent the conversion rate - percentage of rounds where they get the first blood and the second kill as well.
